Using the ColorSense

Color Selector (included as an insert with the

book) as a jumping-off point, *ColorSense* showcases thousands of tried-and-true color combinations based on recognized rules of color theory. Each combination is shown in different values and proportions, as well as against white, gray and black backgrounds to show what the combinations look like in any setting.

This incredibly thorough and useful reference features large tear-out color swatches as well as masking templates for isolating color combinations.
